-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Claims 1-22, 26, 28-32, 34 and 38-45 are rejected under 35 U.S.C. 251. The patent (6,005,306) on which this reissue application was filed has expired for failure to pay the maintenance fee. It is noted that on August 5, 2004 a petition to accept late payment of the maintenance fee was filed. If this petition is granted, then this rejection will be withdrawn and the following matters must be corrected.

2. The reissue oath/declaration filed with this application is defective because it fails to contain a statement that all errors which are being corrected in the reissue application up to the time of filing of the oath/declaration arose without any deceptive intention on the part of the applicant. See 37 CFR 1.175 and MPEP § 1414.

Claims 40-45 were filed after the original declaration was filed. There must be a supplemental declaration acknowledging that errors corrected by these claims arose without deceptive intent.

3. The amendment submitted on October 6, 2003 does not comply with 37 CFR 1.173(d). Claims 20, 26 and 34 contain brackets for the deleted subject matter. Deleted subject matter should not be presented in the claims that are not a part of the original patent. Only the desired text completely underlined is to be presented.

4. This application is objected to under 37 CFR 1.172(a) as the assignee has not established its ownership interest in the patent for which reissue is being requested. An assignee must establish its ownership interest in order to support the consent to a

reissue application required by 37 CFR 1.172(a). The assignee's ownership interest is established by:

(a) filing in the reissue application evidence of a chain of title from the original owner to the assignee, or

(b) specifying in the record of the reissue application where such evidence is recorded in the Office (e.g., reel and frame number, etc.).

The submission with respect to (a) and (b) to establish ownership must be signed by a party authorized to act on behalf of the assignee. See MPEP § 1410.01.

An appropriate paper satisfying the requirements of 37 CFR 3.73 must be submitted in reply to this Office action.

All assignees/owners are required to consent to the reissue. Mr. Carros and Mr. Dillon, each owning 1/3 rights to the patent have consented. It is unclear from the record who owns the remaining 1/3 rights in the patent. The owner of the remaining rights must be made of record and that party's consent to the reissue must be submitted.

5. Claims 20-22, 28-31 and 43 are rejected under 35 U.S.C. 251 as being an improper recapture of broadened claimed subject matter surrendered in the application for the patent upon which the present reissue is based. See *Pannu v. Storz Instruments Inc.*, 258 F.3d 1366, 59 USPQ2d 1597 (Fed. Cir. 2001); *Hester Industries, Inc. v. Stein, Inc.*, 142 F.3d 1472, 46 USPQ2d 1641 (Fed. Cir. 1998); *In re Clement*, 131 F.3d 1464, 45

Art Unit: 2836

USPQ2d 1161 (Fed. Cir. 1997); *Ball Corp. v. United States*, 729 F.2d 1429, 1436, 221 USPQ 289, 295 (Fed. Cir. 1984). A broadening aspect is present in the reissue, which was not present in the application for patent. The record of the application for the patent shows that the broadening aspect (in the reissue) relates to subject matter that applicant previously surrendered during the prosecution of the application. Accordingly, the narrow scope of the claims in the patent was not an error within the meaning of 35 U.S.C. 251, and the broader scope surrendered in the application for the patent cannot be recaptured by the filing of the present reissue application.

Regarding claim 20-22, 28-31 and 43 in the patent (6,005,306) an amendment was filed on June 18, 1999. In this amendment claim 12 was amended to overcome a prior art rejection. Specifically, details relating to the mode selector switch were added to this claim to avoid a prior art rejection. In the arguments on page 7 the distinction between claim 12 and the applied prior art were identified. The arguments identify a first mode and a second mode and states the prior art does not disclose this type of control logic. Newly presented claim 20 only recites the first mode. Since an amendment and arguments were presented specifically directed to the control provided by the mode selector, it is deemed to be recapture to present a claim broader in this particular claim limitation.
